

KRISHNAPRIYA SOMALINGA

priya.amarnath23@gmail.com

San Francisco, CA

PROFILE

Driven application development with a proven track record at 3SHTech, enhancing user interfaces and improving app functionality using React and Flutter. I have successfully delivered comprehensive software solutions from concept to deployment.

SKILLS

- React, Typescript, TailwindCSS, Firebase, AntDesign, Redux Toolkit
- Jest, Testing library

EXPERIENCE

Frontend Developer

3SHTech 2022 - present

- Implemented the user interface design utilizing React, **Ant Design** and **Tailwind CSS** ensuring a modern and responsive user interface with enhanced functionality and design components.
- Proficiently managed state using **Redux Toolkit**, enhancing project efficiency and scalability through effective state management practices.
- Collaborated seamlessly with backend developers to **design APIs and modules**, offering valuable insights that contributed to the overall enhancement of project functionality and cohesion.
- Conducted extensive **research on frameworks**, technologies, and tools recommending optimal solutions for project development.
- Actively wrote **tests, integration/unit with Jest** and Testing library.

Flutter Developer

3SHTech 2019 – 2020 & 2021 – 2022

Next on Plate & SuitApp

Planner apps enabling users to plan weekly meals & organizing and storing clothing items with images. Utilized **SQLite** for seamless database functionality

PROJECTS

Food Ordering App

- Built a dynamic online food delivery application using React for a seamless user interface.
- Implemented **Redux Toolkit** for efficient state management, enabling smooth user interactions and a cohesive application flow.
- Integrated **third-party APIs** to access and display an extensive collection of food data.
- The application allows users to effortlessly select and add items to their cart for delivery to their desired address, providing a convenient and enjoyable food ordering experience.

Expense Tracker

- Developed a comprehensive budget-tracking application using React and React Router DOM.
- Implemented efficient loading mechanism through loaders and actions to enhance user experience
- Integrated local storage for seamless data storage, providing users with a user-friendly and effective tool for budget management.
